

Families are constantly in the process of transformation. A family portrait helps to highlight the memories of each season a family group experiences. Capture the changing looks, newest members and personality traits of your family as a part of your personal history.

Children change rapidly and are constantly growing in personality, size and experiences. Life's busy pace can make it tough for parents to find the time to photograph and document these quickly advancing stages. It is with expertise and care that Kate creates images of children's development and personality.

Maternity Portraits are very special. The brief few months before the baby arrives are precious, marking the transition of a family and announcing new life.

Investment: The Portrait Sitting Fee is \$250 and includes a pre consultation, up to 90 minute portrait session, custom image preparation, viewing and ordering session, an online gallery and online slideshow!

You value the art of beautiful, custom portraits and you'd like one-of-a-kind images of your loved ones, capturing your unique style and personality! Congratulations! Kate Kelly Photography offers a unique experience and approach.

Step One:

Schedule a time to **come to our friendly NE Portland home studio for your portrait consultation!** We'll show you samples from several of our recent sessions and figure out the perfect location for you, whether it's a cool, urban Pearl District backdrop, a lovely garden setting, your home, or the neighborhood park special to your family! We'll also find out your preferences – do you prefer black and white, color or a nice mix? We'll show you our gorgeous array of custom products including wall canvases, albums and holiday cards and we'll also give you tips on what to wear! The location and clothing you chose should all bear in mind what you want to do with your gorgeous images! Do you want to display a large canvas in your living room? If so, what is the style and color of your décor? We will guide you through the entire process to ensure your portraits exceed expectations! We'll also set up a time for your viewing & ordering session!

Step Two:

**The session!** We'll meet at the location we determined at your portrait consultation and shoot for up to 90 minutes! Expect to have fun and be yourselves! If your three year old wants to bring her favorite doll or wear her tutu for a few whimsical poses at the end, wonderful!

Step Three:

**Viewing & Ordering Session!** Within three weeks of the shoot we'll have you back to our friendly studio where we'll show you the final 40 gorgeous images from your session on the big screen! We'll help you choose the products or collection best for you! Collections offer the highest value for your investment. At this time you'll place your order, and all orders placed at the ordering session receive a 20% discount so feel free to bring along anyone who'd like to take advantage of the discount (grandmas, aunts, friends, etc.). Complimentary low resolution/web resolution file with the KKP logo for every print purchased. Wonderful for Facebook albums or personal blogs! We will schedule 90 minutes for this session, and although we love little ones, we recommend leaving small children at home as they quickly grow bored and tired of sitting.

Step Four:

After your viewing & ordering session **We will upload your final images to an online gallery** for ten days enabling others to view your images as well as order prints from the session! We'll also upload a beautiful online slideshow you'll be happy to share with friends and family.

Step Five:

**Pick up your gorgeous prints and products from the studio!** Please allow three weeks for prints and one to three months (depending on the style) for custom product including canvases and albums. Enjoy the beautiful images of your loved ones for years to come!

Call the studio at 503.284.6035 or email Angie Tabaczynski, Studio Manager, at [angie@katekellyphotography.com](mailto:angie@katekellyphotography.com) to set up your consultation or for additional information!
